السلام عليكم انا معاذ سيد شعبان محمود نصر محلل بيانات مبتدىء أريد أن اعرض اول مشروع تحليل بيانات تجريبية لنشاط تجاري المتاجر العالمية الكبرى مجموعة شاملة ومتعددة الأبعاد لسجلات معاملات البيع بالتجزئة تصدر اجهزة إكترونية ومستلزمات مكتبية و أثاث منزلي و مكتبي التحليل عن الأرباح في كل سوق أو منطقة في أنحاء العالم من ناحية المبيعات والربح و الكمية و حالة الشحن و التكلفة

Overview:

Tracking over 51,290 orders across 140+ countries, the tabular dataset simulates the Operational scope of a multinational e-commerce retailer. It was originally sourced from Kaggle. The period from December 2, 2010, to December 29, 2014, and contains 51,290 items in the orders distributed across 25,035 unique orders across six market regions (Asia, North America, LATAM, EU, WAEE, and Africa). It includes 3 categories. It is divided into 17 sub-products. While the reported total profit amounts to $1,467,457, *shipping cost equals 92% of the reported profit (10.7% of sales)*, and Shipping cost of 92% is estimated at $1,352,815.70, and this led to a decline, or made the company's true net profit drop to $114,642 only, and that number represents 8%. There is another reason for this percentage. There is another reason why this percentage reached this
